

*This walkthrough will get you started using your new Spelling Helper application, and will teach you about several of its features.*

## Getting Started

1. Start up your application on your phone. Each phone is different, so refer to your phone's user manual if you need help.
2. You'll see the following splash screen on your phone. You can press any key to skip the splash screen, or just wait 3 seconds.

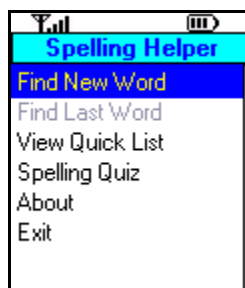

3. You will then be presented with the main menu. You can move up and down the list by pushing UP and DOWN. To make a selection, press SELECT/OK. Pressing CLR/BACK will quit the application (or you can select "Exit" from the menu).

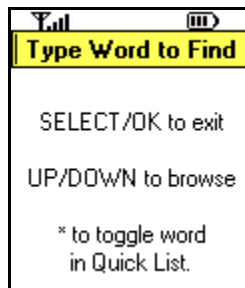

## Finding a Word

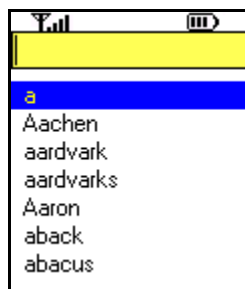

4. Lets say you aren't sure if the correct spelling of a word is "receive" or "recieve". Lets start by selecting "Find New Word." Highlight the first item and press SELECT/OK.

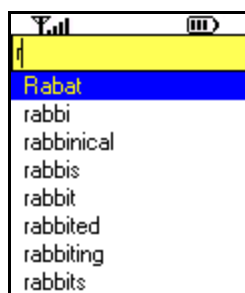

5. You will be shown some simple instructions that tell you what some of the buttons do in this mode. Press SELECT/OK to clear the instructions.

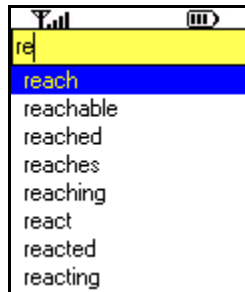

6. You will now see an empty text entry field at the top and a list of words on the rest of the display. The first word in the list is highlighted. You will be able to enter text in the entry field and you'll see words that match your entry in the list below.

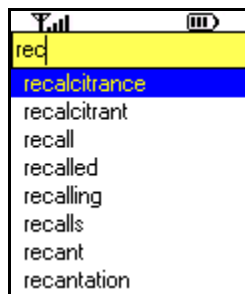

7. Lets find out which is the correct spelling: "r e c i e v e" or "r e c e i v e"? Since we know that the word starts with "r e c", lets type in those letters.
8. Press 7-7-7 to enter an 'r'. You will push the 7 button three times because 'r' is the third letter on the 7 button. You will see 'r' in the text entry and the word list now shows words that start with 'r'.

9. Press 3-3 to enter an 'e' (it's the 2<sup>nd</sup> letter on the 3 button). You will see 're' in the text entry and the word list now shows words that start with 're'.

10. Press 2-2-2 to enter a 'c' (it's the 3<sup>rd</sup> letter on the 2 button). You will see 'rec' in the text entry and the word list now shows words that start with 'rec'.

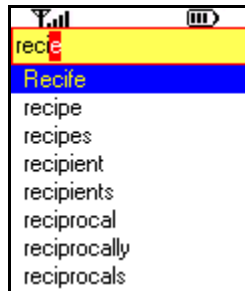

11. Now you aren't sure if its and 'ie' or 'ei' that comes next. Lets try the 'ie'.

12. Press 4-4-4 to enter an 'i'. You will see 'reci' in the text entry and the word list now shows words that start with 'reci'.

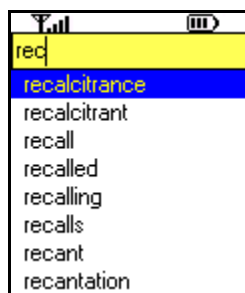

13. Press 3-3 to enter an 'e'. You will see 'recie' in the text entry. Notice that the cursor under the 'e' and the box around the text entry is drawn in red. Also, there are no words displayed in the word list that start with 'recie'. This tells you that "recieve" can't be the right spelling.

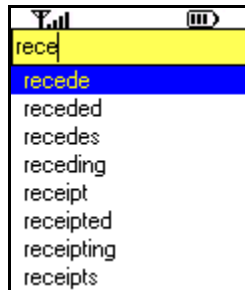

14. Try to enter a 'v' by pressing 8-8-8. Notice that the red 'e' is replaced with a red 'v'. It won't let you type 'reciev' because that doesn't spell a word. The 'v' is also in red because 'reciv' doesn't start a valid word.

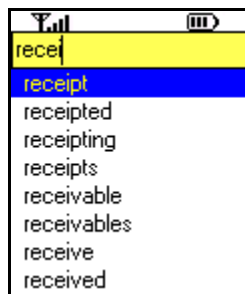

15. Erase the last two letters by pressing CLR/BACK twice. You can also erase letters by pressing the LEFT key. You will see 'rec' in the text entry and the word list will now show words that start with 'rec'.

16. Press 3-3 to enter an 'e'. You will see 'rece' in the text entry and the word list now shows words that start with 'rece'.

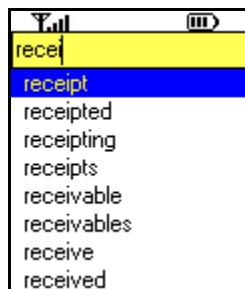

17. Press 4-4-4 to enter an 'i'. You will see 'recei' in the text entry and the words list now shows words that start with 'recei'.

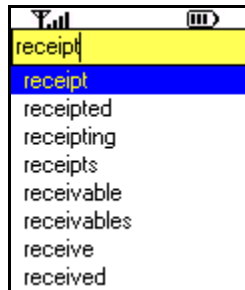

18. Look down the words list, and you'll notice that "receive" is in the list. That's it! You've found the correct spelling.

### **Using The Quick List**

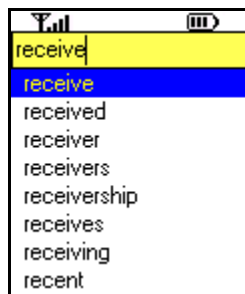

1. Let's say you often spell "receive" wrong, so you always need to check how it's spelled. Let's save the word in a Quick List so that we don't have to go looking for it again. These steps assume you are continuing from the last step in "Finding a Word". If not, select "Find New Word" from the main menu and type in "recei" into the text entry field. Either way, the display should look like this.

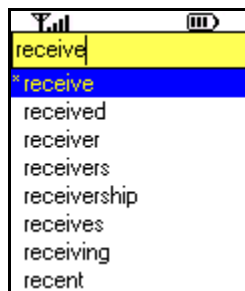

2. Press DOWN once. The text entry field will be replaced with the highlighted word “receipt”.

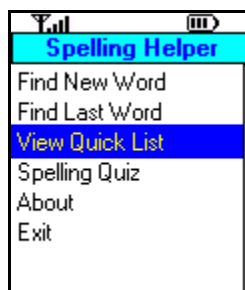

3. Keep pressing DOWN until “receive” is highlighted. If you go too far, you can press UP to scroll the list in the other direction.

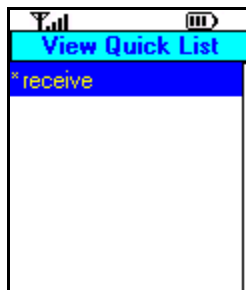

4. Press the \* key. This will mark the word with a \* and put the word in your quick list. You can push \* again to remove the word, but for now, lets leave the \*.

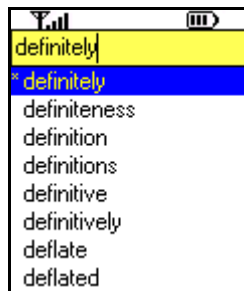

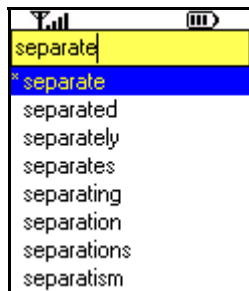

5. Push the SELECT/OK key to return to the main menu. You can also return to the main menu by pressing CLR/BACK or LEFT when the text field is empty.
6. Move the highlight to “View Quick List” and press SELECT/OK.

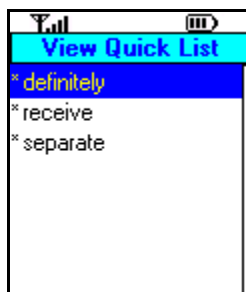

7. There is your quick list! If you press \*, you can remove the highlighted word from your quick list. Instead, let's add some more words to your quick list.

8. Press SELECT/OK or CLR/BACK to return to the main menu. Select "Find New Word" and add "separate" and "definitely" to your Quick List. Remember, type out the first few letters of the word, use UP and DOWN when you get close to your word, and use CLR/BACK or LEFT to erase any mistakes. When the word is highlighted, press the \* key to add it. When you are done finding a word, you can press SELECT/OK and then select "Find New Word" to find another word. The "Def" in "definitely" might give you some trouble because D E and F are all on the same key. Just wait 2 seconds for the cursor to turn from an overtyping block to an insert line. Or, push the RIGHT key to move the cursor from an overtyping block to an insert line.

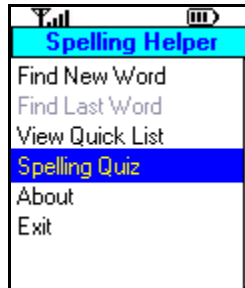

9. Return to "View Quick List" by selecting it from the main menu. You'll now see 3 starred words in your Quick List. These words will be saved on your phone, so you can quickly review them whenever you need to.

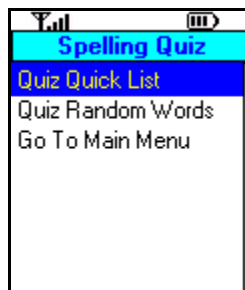

### ***Practicing with a Spelling Quiz***

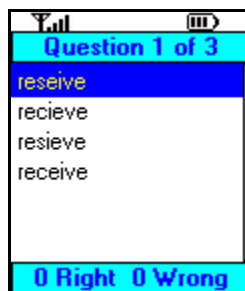

1. Now that you've had the chance to study the words in your Quick List, let's see if you can spell them correctly on your own.
2. Select "Spelling Quiz" from the main menu.

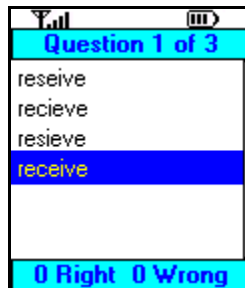

3. You will now see the Spelling Quiz menu. You can either quiz yourself on 1) the words in your quick list (by selecting "Quiz Quick List") or 2) ten words at random from the entire word list (by selecting "Quiz Random Words"). For now, let's select "Quiz Quick List".

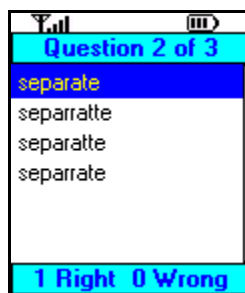

4. The spelling quizzes are generated randomly, so you won't get the same word order or same possible answers each time. This means that you can keep taking the quiz and you will be challenged each time. It also means that the manual won't exactly match what you see, but it will look something like this:

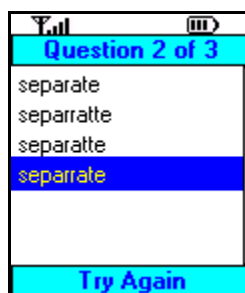

5. The screen shows a few misspellings of the word and one correct spelling. On the top of the screen you'll see what question you are on, and the bottom will tell you how many you've gotten right and wrong so far. Highlight what you think is the correct answer and press SELECT/OK. You can also push 1, 2, 3, or 4 to guess the 1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup>, or 4<sup>th</sup> word.

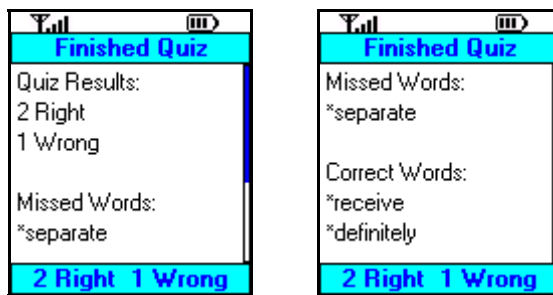

6. If you get the answer right, you go to the next question. On the bottom of the screen, you'll see that it now says you've gotten 1 right.

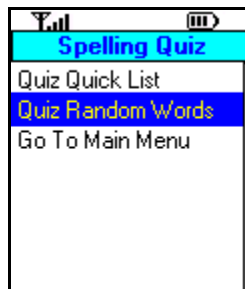

7. On this question, lets purposely get the answer wrong. Select an incorrect answer. After selecting the wrong answer, the display will show "Try Again" on the bottom.

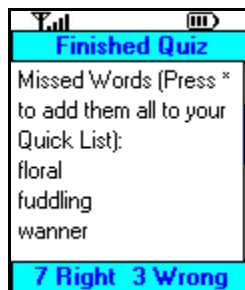

8. Finish the quiz by selecting the correct answer for Question 2 and Question 3.
9. After finishing the quiz, you will be taken to the Quiz Result screen. This screen shows you how many and which words you've gotten right and wrong. You can scroll through the screen using the arrow keys. There is a \* next to each word because these words are in your quick list. Press SELECT/OK or CLR/BACK when you are finished.

10. Try taking a Random Quiz. You will be given 10 questions selected from the entire word list.

11. When you get to the results screen, you'll see that your missed words probably don't have a \* next to them. This is because they aren't in your quick list. If you'd like to study them for later, push \* and it will add them.

### ***That's it!***

You've learned all there is to the Spelling Helper. You'll get lots of use out of it and have fun learning new words. Feel free to explore and play with it...if you can't figure something out, refer back to the manual or just try it and see what happens. Have fun!
